

CORE SOLUTION

MEDITECH Release Management

Maximize Your MEDITECH Investment

Keep your organization moving forward with a seamless update process and expert release management services

> USE CASES

- + Before scheduled system updates of deployed MEDITECH solutions
- + To validate and test issues as a result of a system update of MEDITECH
- + For ongoing life-cycle management and optimization of MEDITECH solutions

> BENEFITS

- + Efficiently ensure the performance and efficacy of MEDITECH by assuring up to date system code and enhancements are in place
- + Reduce risk of disruption as a result of code and system updates with expert validation and integrated testing
- + Allows your resources to focus on optimization opportunities with recommendations from MEDITECH-Ready Certified experts
- + Benefit from a structured and proven validation process managed with the same tools as our own MEDITECH solution
- + Fixed-fee or subscription options provide valuable project-based cost model

The Productive Way To Manage The MEDITECH Lifecycle

The pace of MEDITECH releases is accelerating – and with a potential update each quarter, your team is weighing how to keep up. With a typical release containing upwards of 3-4,000 changes, it can be a challenge to get beyond break-fix and address opportunities for enhancements and new functionality.

Enter Release Management from CereCore - a set of services that reduce the burden of assessing the impact of new code, testing, workflows, vendor coordination and more. CereCore Release Management is provided by a team of MEDITECH experts with a structured and proven process managed with the same best in class tools as our own internal MEDITECH environment. The result is the blocking and tackling is covered so that your team can focus on what truly matters, enhancing the solution for your caregivers.

Release Management services are provided in a fixed-fee or subscription model and include:

System Validation – allows comprehensive testing of menus, functions and parameters to ensure that the new code will not create issues in the live solution

Integrated Testing – performed by our MEDITECH-Ready Certified team eliminates the burden on internal resources

Decision Review – provides documentation for enhancement options to assist in making informed decisions specific to your site

Reports and Customer Dashboard – provides testing reports needed for regulatory purposes as a dashboard on progress

Release Management On The Fast Track

Through our proven process, the release management solution can be completed in as little as 15 days. This validation process includes all the services needed to move beyond impact and code assessment quickly to allow your internal resources to focus on enhancements that move you forward.

MEDITECH SYSTEM VALIDATION

- Level 1 - Menu/Access Validation
- Level 2 - Validation of System Parameters
- Level 3 - DRSS Scan (Live Only)

INTEGRATED TESTING

- Integrated testing for corrections
- Individual testing of pending fixes

DECISIONS REVIEW

Enhancement review, categorization and identification of opportunities that align with facility priorities for deployment

Why Choose A Core Solution?

CereCore® has combined expertise, automation, and methodologies from years of successful health IT projects to provide time and cost-saving options to optimize your EHR, address regulatory compliance, and adopt new functionality. Core Solutions feature a fixed-fee or fixed scope delivery model to demonstrate quick return on investment and keep your health system moving forward.
