

# CORE SOLUTION

## MEDITECH Rules & Worklists

Virtually instant MEDITECH optimization  
with production-ready rules and worklists

---

### > BENEFITS

- + Streamlines administrative processes by putting the right patient data at your fingertips.
- + Provides production-ready rules and/or worklists for almost instant MEDITECH optimization.
- + Automates calculations, functions, messages, data entry, and more (with optional customization).
- + Includes training, documentation, and (optional) customization in a matter of days.
- + Provides cost-effective option for pre-built worklists that have been tested in MEDITECH-based facilities across the nation.

### Small Conveniences Add Up To Big Efficiencies

From finding incomplete information such as payor records, flagging patients with special indicators, to identifying a patient call list, small conveniences add up to big efficiencies. MEDITECH Worklists make daily tasks easier by placing the right information at your fingertips. Powerful efficiencies can be achieved when a facility uses worklists and rules that support workflows through automated calculations, messages, and data entry.

CereCore's library of MEDITECH Worklists and Rules are pre-built, tested, and customizable items that can be deployed in your system within a matter of days. Our solution takes the effort and cost from developing these internally. Here's how it works:

- + You choose a set of worklists or rules from our library
- + We build, personalize or customize in your TEST Ring
- + We re-test before you approve for go-live
- + You receive documentation and training (train-the-trainer) on new functionality

### A Power-Packed Library Of Rules And Worklists

Purchasing packs of rules or worklists and implementing together provides the most cost-effective process for optimizing MEDITECH after or during implementation. Combined, this growing library provides over 125 options for ready-made functionality.

## WORKLISTS

Use custom worklists from Patient Access applications to put critical data at your fingertips to make daily tasks easier to accomplish and track.

### FEATURED LISTS:

- Medicare Secondary Payor – incomplete or elapsed
- Confidential Patients – appearing on facility directory or clergy lists, VIP, or incarcerated
- Motor Vehicle Accident lists
- Medicare Policy Discrepancies
- Self-Pay lists
- Admittance lists – 30 day re-admittance, from ED, from skilled nursing
- Information checks – social security, birth name update, no email on file
- Free Text entries
- Preferred Language not English; Interpreter Needed, Scheduled, or Canceled
- Census lists – Front Desk (restricted from displaying confidential patients), ED, Surgery, Referred, CLI, Inpatient, Newborn, Observation
- No Show and Cancellation lists
- Short Form Review
- Accounts – Referred, Pre-Status, SCH Status
- Call Lists – CLI, RCR, SDC, REF
- Register – Inpatient and observation admission, discharge

## RULES

Personalize pre-configured and generic build Expense M-AT rules to automate calculations, functions, messages, data entry and assist in user behaviors based on data entry.

### FEATURED FUNCTIONALITY:

- **Default data into the system:** date, time; Y/N response to query based on EDM event; last comment for timed care episode; start time; previous responses to a new query; lab results into query
- **Verify and modify data:** date or time based on check of status or query
- **Prevent inaccurate or inappropriate data:** inappropriate response based on patient's age, sex, or specific responses from being selected together; prevent none as an option; disallow future time/date entry
- **Require data, a query or answer:** based on location or query, registration status, patient's age, when already asked in a visit; when one of two questions is completed
- **Calculate:** the MPI, Meters, V02 and METS as part of the Six Minute walk test based on distance and steps; score for Obstructive Sleep Apnea (Stop-Bang), next vaccine dose date; duration based on stop/start time
- **Skip or stop on a query:** based on another query response, multiple group response, patient's age, account registration status
- **Notify and warn users:** of duplicate orders, before deleting an account number; of two orders being entered at the same time
- **Launch pop-up messages:** with URL link based on response to Y/N query
- **Prevent conflicts:** create an OM conflict if two orders are entered at same time; prevent order from being placed if appropriate queries are not complete or sex mix-match
