

ADVISORY SERVICES

Navigating Organizational and Industry Complexities to Guide You to Success

As rapid advancements in digital transformation and consumerism create chaos within the healthcare industry, organizations are required to adapt quickly. Leadership is forced to juggle between maintaining excellence in operational environments and espousing innovation. As organic growth in areas such as data analytics, mobile health, and interoperability continues, the opportunities to establish the right governance structure to align IT investments with core business strategies are becoming more evident. Through our experience and expertise, we can help you maneuver through the many complex issues you are up against including new technology, a major merger and acquisition project, or adding a new facility. We help you maintain technology relevance by offering guidance on governance structures, strategic planning, program development, and introduction of pragmatic innovations.

Strategy

When navigating system selection and implementation, governance structure, and M&A activity, strategic planning should be easy to understand, actionable, and pragmatic. We provide tactical plans as well as how to execute, monitor, and measure those efforts to ensure proper outcomes. We help you manage IT projects and investments by clearly aligning business goals and strategies.

Transformation

We recognize that patients and physicians drive change in the healthcare industry and this change is happening at an incredibly fast pace. We help you properly leverage your investments in transformational technologies to offer more convenient access to care and give you the tools to track the cost and quality of care.

Optimization

We walk you through the steps to optimize your IT environment from the physician and patient perspective in order to create lasting change and organizational satisfaction. By leveraging Six Sigma, Lean, and other toolsets, we are able to demonstrate the improvements in workflows using analytics and actionable data. We also specialize in consolidating the applications and refreshing the remaining contracts to eliminate redundancies and streamline services.

Discover how we can work together.
